

Class D

Manufactured and Tested to ANSI/UL Standards
ISO-9001:2000/ISO-14001:2004 Certified
FM APPROVED

- ★ Dependable Drawn Steel Cylinders
- ★ All Metal Valve Construction
- ★ Unique "soft flow" extension applicator plus built in long range nozzle
- ★ Special corrosion resistant yellow (Class D) color coded paint finish
- ★ F.M. listed (TO ANSI/UL 299 and ANSI/UL 711)
- ★ Bar Coded and Bi-lingual Labels

The Amerex "soft flow" extension applicator is particularly suited for fighting Class D fires. It keeps the operator's hands away from the extreme heat and prevents inhalation of toxic fumes caused by burning material. The easily controlled, even discharge provides a non-dispersing application of the agent. The applicator may be quickly detached to provide a straight stream of chemical where greater range, a narrow discharge pattern or a lobbing effect is required.

(Temperature Range -40°F to 120°F)

SPECIFICATIONS	CLASS D Dry Powder	
	Sodium Chloride	Copper
Powder Type	Sodium Chloride	Copper
Application	Hose & Nozzle or Applicator	
Model Number	B570	B571
Size & Capacity (lbs.)	30	
Shipping Wt. (lbs.)	53	
Height (in.)	32	
Width (in.)	13	
Depth (Diam. - in.)	8	
Range (ft.) with Applicator	3 - 6	
Range (ft.) with Nozzle	8 - 10	
Discharge Time (Sec.) - Applicator	24	18
Discharge Time (Sec.) - Nozzle	13	
F. M. Approved	Yes	
Standard Bracket	Wall	

Stored Pressure

FOR COMBUSTIBLE METAL FIRES

MODEL B570 contains a special blended Sodium Chloride based dry powder extinguishing agent. Heat from the fire causes it to cake and form a crust excluding air and dissipating heat from burning metal. Metal fires involving magnesium, sodium, potassium and sodium-potassium alloys can be successfully extinguished with this extinguisher. There is data showing that zirconium, uranium, titanium, and powdered aluminum fires can be controlled and extinguished with this unique extinguisher.

Available in 150 lb. Wheeled or Stationary

MODEL B571 contains a copper extinguishing agent specially developed by the U.S. Navy for fighting lithium and lithium alloy fires. The copper compound smothers the fire and provides an excellent heat sink for dissipating heat. Copper powder has been found to be superior to all other known fire extinguishing agents for lithium.

Available in 250 lb. Wheeled
